

**NR IMPLEMENTATION BULLETIN NUMBER 203.2-149, REVISION 0 FOR DOE ORDER 203.2, MOBILE TECHNOLOGY MANAGEMENT**

NR Implementation Bulletin (IB) 203.2-149 Revision 0 implements DOE Order 203.2 dated May 15, 2014. DOE Order 203.2 contains an equivalency for Naval Reactors and specifically identifies that the "Deputy Administrator for Naval Reactors (Director) will implement and oversee requirements and practices pertaining to the Directive for activities under the Director's cognizance, as deemed appropriate."

Consistent with the Naval Nuclear Propulsion Program (NNPP) overall concept of operations, the following provides specific implementation guidance for DOE Order 203.2, *Mobile Technology Management* (hereafter referred to as "the Order"), for those activities under the Director's cognizance. This guidance takes precedence over DOE Order 203.2, *Mobile Technology Management*, and guidance found in other related DOE documents.

For matters in which Naval Reactors has prescribed or approved requirements for use in the NNPP, the Naval Reactors requirements shall be used in lieu of guidance contained in DOE Order 203.2 or any referenced order or guide. Such matters include shipboard naval nuclear propulsion plants and their support equipment and test facilities; radiological matters, including the control of radioactivity and radiation associated with Naval Reactors program; reactor and nuclear safety; and matters affecting the occupational safety and health of the workforce.

This Order has NR equivalency, and it is NNPP practice to apply the provisions of DOE Orders to the extent they are appropriate and consistent with the Program practices. Accordingly, the duties and responsibilities delineated in the Order for various DOE headquarters components are carried out by Naval Reactors or the Prime Contractor in accordance with existing Program policies and practices. Involvement of other DOE headquarters offices, such as the DOE Chief Information Officer, shall be initiated by Naval Reactors as appropriate.

The Prime contractors shall develop a comprehensive set of Mobile Technology Management policies and procedures that meet the intent of the Order and will issue these as a corporate instruction/policy. In cases where the Order contradicts existing Naval Reactors policy or direction, the existing policy will be used or the Prime Contractors may recommend modifications as appropriate. In addition, some items in the Order do not currently apply (e.g., Naval Reactors does not allow personally owned mobile devices to access DOE networks); however, these can be addressed in policy as appropriate.

Government personnel issued a phone through the Prime Contractors will be subject to the policies and procedures developed by the Prime Contractors. Government personnel issued a mobile device by the Navy (e.g., NRHQ personnel) will continue to use the Navy procedure as this Order and IB do not apply to those devices or personnel.
